

## iOS Mobile Developer Job Description

Ready for a chance to learn new technologies and work with awesome people? CrossComm is looking for a great candidate to join its agile development team in Durham, NC. This position reports directly to our Chief Software Architect and offers the following:

- **Cutting Edge Technology Exposure:** we have a track record of staying on the forefront starting with web development in the 90's and developing one of the first 500 apps on the iTunes App store on Day 1 and always looking for the next big thing
- **Work/Life Balance:** we honor great work, not sitting in the office all night and the expectation of this role is 40 hours/week
- **Technical Management Team:** report directly to our Chief Software Architect, who has a Masters in Computer Science, and work with a highly competent team which is led by the founding CEO with over 15 years experience leading CrossComm

The immediate need is for an iOS mobile developer but we would desire a candidate motivated to continue learning new skills and be able to develop in multiple platforms. We want someone who is an excellent learner, highly intelligent and excels when given an opportunity to grow.

### Qualifications

#### Must Haves

- Fun to work with (seriously we have a small and awesome team and we want to keep this)
- Professional hands-on programming experience
- Demonstrable experience with any or all of the following languages/frameworks: Objective-C, Java, JavaScript, C/C++/C#, Spring, iOS, Android, Node.js
- Well versed in native clients, server-side platforms and their interactions
- Experience with real-time asynchronous development of server and/or client products (Pub/Sub frameworks, Socket.io, HTTP request streaming, etc.) is preferred
- Strong object-oriented programming skills and knowledge of design patterns and how they can be applied in various environments
- Demonstrable experience in learning a new language or technology quickly and meaningfully

#### Nice to Haves

- Master's/Bachelor's degree or equivalent in Computer Science or Computer Engineering

- Practical experience working within a defined software development cycle. Agile experience preferred.
- User interface design and/or graphic design experience preferred
- Experience creating platforms that support multiple clients is a plus

## **Salary and Benefits**

Pay will be commensurate with experience. CrossComm offers competitive health and dental benefits, a flexible work environment as well as an extremely generous profit sharing program to help you share in our successes. Most of all, CrossComm has a warm, friendly team – which makes for an awesome work environment.

## **Contact**

Please email [careers@crosscomm.net](mailto:careers@crosscomm.net) (please include “iOS Developer” in your email subject) with your resume and a persuasive cover letter. Please be prepared to send code samples and a portfolio of previous work with detailed descriptions of your involvement scope (what you did and did not do for a given project). A digital portfolio is a plus.

## **About CrossComm**

Founded in 1998, CrossComm, Inc. is a Durham based mobile and web app studio that helps organizations to bring their digital aspirations to life. Consisting of 7 team members, the company aims to push further into the online and mobile space by creating internal intellectual properties that fit within our company’s vision.

CrossComm was founded on Christian principles and team members pray in team meetings: being Christian or participating in prayers are not job requirements, but applicants should be aware of and comfortable with this aspect of our company culture. We seek someone who shares our commitment to value people and make a positive difference in the local community and beyond.
